Accidents in Physical Education and Countermeasures

— Compensation for Accidents and Relief of Sufferers —

By *Ryuji Takamine**

In this study, discussion is made on compensation problems generating as a result of accidents in physical education and on measures to counter such problems. The sufferers from accidents sustain physical, mental and economic losses.

Accordingly, sufferers should be compensated for their losses regardless of the causes of accidents, and there should be a system to relieve these victims in some way of other.

In this paper, it is made clear as to in what shape sufferers are being relieved, and analyses are made of the usable systems in existence.

In relieving victims, the most significant question pertains to the fact that the matter is contented in court in a shape of demanding for compensation for damages.

To prove the act of the defendant (a school administrator or a teacher) as illegal is the point in dispute in court.

In most cases, a matter is brought to trial when the victim (plaintiff) has not been contented with the value (solatium) he received.

The fact that suits are instituted in various areas may tell that the accident victims are not be satisfied with the present relief systems.

As the public relief systems in existence, the one that is being used most extensively is the Accident Benefit System, Japan School Safety Association.

Covered by this system is: Death solatium—¥12,000,000, disability solatium—¥15,000,000 maximum (14 grades in total).

However, the amount demanded for payment in recent days far exceeds the amounts mentioned above.

Therefore, an urgent business imposed on the school administrator may be said to secure revenue sources to fill up balances. There exists insurance system named

a reparation liability insurance.

The school administrators (founders) and the teachers in charge of physical education, while they study accident prevention measures and measures for handling accidents after their occurrence, should not forget to work out measures for relief of victims.
