A. APPLICATION OF THE BULGARIAN TREATY

1. The B.C. condition of a material which is not identical with the material on which the manufacturer has produced the material. If the B.C. condition is not identical with the material on which the manufacturer has produced the material, the manufacturer is not liable for any damage caused by the product. If the B.C. condition is identical with the material on which the manufacturer has produced the material, the manufacturer is liable for any damage caused by the product.

2. A situation arises if the material is not identical with the material on which the manufacturer has produced the material. Under such a situation, the manufacturer is not liable for any damage caused by the product.

3. The manufacturer must take steps to ensure that the material on which the manufacturer has produced the material is identical with the material on which the manufacturer has produced the material. If the manufacturer fails to take such steps, the manufacturer is liable for any damage caused by the product.

B. APPLICATION OF THE BULGARIAN TREATY

1. The B.C. condition of a material which is not identical with the material on which the manufacturer has produced the material. If the B.C. condition is not identical with the material on which the manufacturer has produced the material, the manufacturer is not liable for any damage caused by the product. If the B.C. condition is identical with the material on which the manufacturer has produced the material, the manufacturer is liable for any damage caused by the product.
