Seminar camp

My students kindly plan various events each year, which have to date included caving, trekking, fishing, rafting, park golf, and soba noodle making.

Gifts

I decorate my laboratory with gifts from Lab members on their graduations. They have handcrafted the scale models of robots and stickers depicting my face.

Genya Ishigami's ON and OFF

While I may look like someone who spends both their ON and OFF time in the outdoors, in fact I also love to be indoors.

Field experiments

Field experiments are always tough and challenging, but I have come through many field experiments since my student days.

MIT/JAXA era

This five-year period broadened my horizons at a stroke by a wealth of experiences.

Family time

My arrival at Keio coincided with the arrival of my daughter, and recently it seems that she has become aware that "Daddy makes robots." Sometimes I even bring my children into the lab.

Camp and coffee

I often accompany my elder sister's family on camping trips. The appeal of this lies in spending a relaxing time in the great outdoors without having to constantly watch the clock. Coffee enjoyed first thing in the morning during camping is also second-to-none.

The Grand Circle

A drive equivalent to the length of Japan which, as the name suggests, gave me the chance to see glorious expanses of nature. Next time I'd like to bring my children.
