Index

- a priori probability, 182
- admissible (Definition) , 281
- almost always, 80
- almost experimentally true, 9, 35, 39, 86
- almost independent sequence with the identical distribution, 82
- approximate exact observable, 41
- approximate simultaneous measurement, 299
- Aristotles, 9, 149
- automata theory, 65
- Avogadro constant, 76
- Axiom 1 [Measurement axiom], 29
- Axiom 2 [The Markov relation among systems, the Heisenberg picture], 65
- Axiom^{*W**} 1 [The *W**-algebraic formulation of Axiom 1], 234

- $\mathcal{B}_{\mathbf{R}^d}^{\text{bd}}$, 40
- Banach algebra, 16
- $B(V)$, 18
- Bayes operator (Bayes-Kalman operator), 98, 134
- Bayes theorem, 98
- Bayes' method, 196, 197
- Bayes' postulate (= the principle of equal weight), 214
- BMT (=belief measurement theory), 208
- belief weight (approval rate, conviction degree), 210
- Bell's inequality, 69
- Bell's thought experiment, 49
- Bertrand's paradox, 182, 218
- Boltzmann constant, 81
- bookmaker, 217
- $\mathcal{B}_{\mathbf{R}}$, 28
- Borel field, 28
- Born, M., 16
- bounded linear operator (= continuous linear operator), 2, 18
- Brownian motion, 269
- butterfly effect, 272

- $C(\Omega)$, $C_0(\Omega)$, 17
- $\mathcal{C}(V)$, 18
- chaotic system theory, 272
- chaotic theory, 272
- characteristic function, 46
- circuit theory, 65
- collapse (reduction) of wave packet, 198
- commutativity condition, 24
- completely random measurement, 288
- complex system theory, 272
- conditional probability, 31
- consistent condition , 157
- contraposition , 156
- control, 150

covering family of observables, 157
 crisp observable, 22
 C^* -algebra (Definition), 16
 cyclic measurement, 187, 257
 δ_ω , 18
 Dirac notation, 19
 discrete Gaussian observable, 40
 discrete topology, 20
 dynamical system theory (= DST), 2

 entropy(U -entropy), 86
 entropy(of measurement), 204
 entropy(Shannon's entropy), 207
 EPR-experiment (Einstein, Podolosky and Rosen), 315
 equilibrium state, 81
 equilibrium statistical mechanics, 75
 Erdős, 190
 ergodic homomorphism, 288
 ergodic hypothesis, 78, 84
 ergodic theorem, 78
 estimator, 107
 exact observable, 41, 229
 experimentally true or false, 7
 extensive interpretation, 13, 212

 fair coin-tossing, fair dice-throwing, 208
 falsifiability, 9
 field, 21
 Fisher's estimator, 95
 Fisher's maximum likelihood method in classical and quantum measurements, 94
 Fisher's maximum likelihood method in classical measurements, 96, 101

 flow, 78
 form, 29
 foundationalism, 3
 Fourier transform, 231
 frequency probability, 45
 fuzzy decomposition, 27
 fuzzy numbers observable, 40
 fuzzy observable, 22, 228, 230
 fuzzy sets theory, 169

 game theory, 29
 γ -rays microscope, 295
 Gaussian observable, 39, 40, 103, 229, 276, 282
 GDST(= general dynamical system theory), 12
 general system (Definition), 59
 Glauber-Sudarshan representation, 231
 GNS-construction, 19

 Hamilton equation, 55
 Hamiltonian, 55, 56, 78, 244
 Heisenberg kinetic equation, 57, 245
 Heisenberg picture, 66
 Hilbert space, 18
 HMT (= hybrid measurement theory), 180
 homomorphism, C^* -homomorphism, 58
 homomorphism, W^* -homomorphism, 237
 hybrid measurement theory, 180
 hybrid state, 180
 hysteresis, 65
 idea, 22, 29
 idealism, 9

identity, 16, 20, 227
 image observable (Definition), 23
 implication, 156
 inference, 150
 inference interval, 108
 information compression, 272
 information quantity, 204
 invariant state, 79
 involution, 16
 iterated measurement (=simultaneous measurement), 31
 iteration (= loop), 272
 iterative likelihood function method, 121

 χ^2 -observable, 44
 kinetic energy, 56, 244
 Kolmogorov's extension theorem, 262

 label set (=measured value set), 22
 law of large numbers, 45, 90, 281
 likelihood ratio test, 111
 $L^p(\Omega, \mu), L^1(\Omega, \mu), L^\infty(\Omega, \mu), L^1_{+1}(\Omega, \mu)$, 227
 logic (practical logic), 149
 logic (pure logic = mathematical logic), 149
 loss function, 277

 $\mathcal{M}(\Omega), \mathcal{M}^p_{+1}(\Omega), \mathcal{M}^m_{+1}(\Omega)$, 17
 Mandelbrot set, 272
 marginal observable, 23
 Markov operator, 58
 Markov relation among systems (Definition 3.3), 59
 matter, 29
 measurability theorem, 67

 $\mathbf{M}_{\mathcal{A}}(\mathbf{O}, S_{[\rho^p]})$, 29
 $\mathfrak{M}(\{\mathbf{O}_t\}_{t \in T}, \mathbf{S}_{[\rho^p_{t_0}]})$, 60
 $\mathbf{M}_{\mathcal{A}}(\mathbf{O}, S_{[*]})$, 94
 $\mathbf{M}_{C(\Omega)}(\mathbf{O}, S_{[*]}((kG))_{lq})$, 123
 $\mathbf{M}_{\mathcal{A}}(\mathbf{O}, S_{[*]}(\rho^m))$, 178
 $\mathfrak{M}(\{\mathbf{O}_t\}_{t \in T}, S(\rho^m_0))$, 194
 $\mathbf{M}_{C(\Omega)}(\mathbf{O}, S_{[*]}((\nu))_{bw})$, 213
 measured value set (越abel set), 22
 measurement, 29
 measurement error (Definition), 275
 measurement error model in PMT, 117
 measurement error model in SMT, 252
 mechanical world view, 12
 membership function, 169
 metaphysics, 9
 metric (or distance), 47
 mixed state, 17
 moment method (generalized moment method), 48, 248, 249
 Monty Hall problem, 105, 107, 188, 289
 MT (= measurement theory), 2
 MT tree, 323
 multiple Markov properties, 65
 Neyman-Pearson theorem, 112
 no information quantity, 124
 normal state (= density state), 226
 normalized invariant measure, 79
 null hypothesis, 111
 null observable, 42
 observable, 29
 observable (Definition), 22
 observable in W^* -algebra, 228

operator algebra, 218
OR (= operation research), 29
 $\times_{k=1}^n, \prod_{k=1}^n$, 24
paradox (de Broglie paradox), 51
paradox (Schrödinger's cat paradox), 32
paradox(EPR-paradox), 50, 52
paradox(Monty Hall problem), 105, 107, 188, 289
paradox(the problem of three prisoners), 190, 291
parallel measurement, 45
parameter, 92
parent map, 60
parimutuel betting, 210, 218
phase space (= state space), 56, 244
Plank constant, 56
Plato, 9
PMT(= pure measurement theory), 3
 PMT_{PEW} , 196
point measure, 18
population, 92
posttest state, 98
potential energy, 56, 244
 $\mathcal{P}(X)$ ($=2^X$), 21
pretest state, 98
principal components analysis, 255
principle of equal a priori probability, 79
principle of equal probability, 208, 288
principle of equal weight (= Bayes' postulate), 214
probabilistic interpretation of statistical mechanics, 79
probabilistic measurement, 177
probabilistic state, 177
probability space, 26
Proclaim 1 (the probabilistic interpretation of mixed states), 179
Proclaim $^{W^*1}$ [Statistical measurements in the W^* -algebraic formulation], 233
Proclaim $^{W^*2}$ [The Markov relation among systems, the Heisenberg picture], 241
pure state, 17
quantity in C^* -algebra (= system theoretical quantity), 29
quantity in W^* -algebra, 229
quantity(momentum quantity), 230
quantity(position quantity), 230
quantum computer, 293
quantum cryptography, 293
quantum mechanics, 5
quantum teleportation, 293
quantum Zeno effect, 198
quasi-product observable (Definition), 23
Radon-Nikodým derivative, 94
random measurement, 282
random number, 271
random observable, 282
random walk, 68
realism, 9
realization of $\mathfrak{M}(\{\mathbf{O}_t\}_{t \in T}, \mathbf{S}_{[\rho_{t_0}^p]})$, 64
realization of observable in tensor space, 301
realization of sequential observable, 61, 63, 195
regression analysis I, 131

regression analysis II, 145
 repeated measurement, 45
 resolution of the identity, 26
 ring, 21
 root, 59
 round error, 40

 S-state (= Schrödinger state), 138
 $\mathfrak{S}^p(\mathcal{A}^*)$, $\mathfrak{S}^m(\mathcal{A}^*)$, 17
 sample space, 31
 Schrödinger equation, 57, 244
 Schrödinger's cat paradox, 32
 Schrödinger picture, 66
 self-similar figure, 272
 semi-distance, 47
 sequential observable (Definition), 59
 $\sharp[\cdot]$, 45
 simultaneous measurement (=iterated measurement), 31
 singlet state, 50, 52
 SMT(=statistical measurement theory), 3
 SMT_{PEP}-method, 208, 218, 280, 288
 spin observable, 33
 state, 17, 29
 state space (= phase space), 17
 state space observable, 268
 statistic, 277
 statistical mechanics, 75
 statistical stat, 175
 staying time interpretation of statistical mechanics, 79
 Stern and Gerlach's experiment, 33
 stochastic differential equation (= stochastic state equation), 2
 string theory, 4
 structure(series structure), 60
 structure(parallel structure), 61
 subjective Bayesian statistics, 208
 syllogism (practical syllogism), 162
 syllogism (standard syllogism), 168

 $Tr(V)$, $Tr_{+1}^p(V)$, $Tr_{+1}^m(V)$, 228
 tensor C^* -algebras, 20
 tensor Hilbert space, 21, 50, 52, 301
 tensor observable, 301
 testing statistical hypothesis, 111
 theoretically true or false, 7
 thermodynamical condition, 81
 three prisoners problem, 190, 291
 TOE (Theory of Everything), 4
 trajectory (Definition), 265
 tree, 59

 uncertainty relation (approximate simultaneous uncertainty relation), 312
 uncertainty relation (Heisenberg's uncertainty relation), 294, 311
 uncertainty relation (Robertson's uncertainty relation), 306
 unintentional random measurement, 288
 unital C^* -algebra, 16
 urn problem, 35, 92, 99, 100, 109, 124, 176, 205, 214, 278

 W^* -algebra, 226
